PRESSURE DYNAMICS

PERROTT ENGINEERING IS NOW PART OF PRESSURE DYNAMICS

Pressure Dynamics is pleased to announce the acquisition of Perrott Engineering, a highly respected provider of hydraulic and precision engineering services in Cairns and the wider Queensland region since 1974. This acquisition is a key milestone in Pressure Dynamics' growth, further strengthening its presence and technical capabilities in Queensland and Papua New Guinea.

With a team of 35 skilled professionals, Perrott Engineering has earned a reputation for excellence in hydraulic and lubrication system design, sales, service, and repair, as well as precision machining. The company has been a trusted partner across mining, defence, marine, energy, and agriculture, consistently delivering solutions that meet the changing needs of these industries.

"After decades of building Perrott Engineering into a trusted name in hydraulics and precision engineering, I'm proud to see it join the Pressure Dynamics family. This transition ensures our clients continue receiving the same high-quality service, now with the added strength and resources of a larger group. Most importantly, it creates exciting new opportunities for our team to grow and take on more complex projects. I leave the business in great hands, confident that its legacy of excellence will continue under Pressure Dynamics Queensland."

– John Perrott, Managing Director, Perrott Engineering.

Founded in Western Australia in 1979, Pressure Dynamics is a leader in specialist hydraulic and crane engineering and maintenance services, with an established presence across Western Australia, the Northern Territory, and now Queensland. The company is recognised for delivering highly technical, innovative, and industry-leading solutions across the Energy, Mining, and Defence sectors, with a strong commitment to quality, safety, and performance excellence.

"Perrott Engineering has built an outstanding reputation for quality and expertise, making it a perfect fit for Pressure Dynamics. This acquisition strengthens our presence in Queensland and Papua New Guinea, expands our hydraulic, cranes, and machining services, and ensures even greater value for our clients. With this transition, it's business as usual—but with more resources, capabilities, and opportunities for both clients and staff. We're excited about the future and look forward to continuing Perrott's legacy under Pressure Dynamics Queensland."

– Snjezan Mackic, Managing Director, Pressure Dynamics.

As part of this transition, Perrott Engineering will now operate as Pressure Dynamics Queensland, bringing together the expertise of both teams while preserving the local knowledge, relationships, and service quality that Perrott Engineering is known for. Clients will benefit from expanded resources, enhanced technical capabilities, and access to a broader range of solutions, ensuring continuity of service while unlocking new opportunities.

Additionally, Pressure Dynamics will integrate Perrott Engineering's proprietary specialist equipment across its Western Australian and Northern Territory facilities, further strengthening its specialist hydraulics and crane capabilities. This strategic expansion reinforces Pressure Dynamics' ability to deliver specialist engineering solutions and comprehensive support across Australia and Papua New Guinea.

Pressure Dynamics remains committed to excellence, innovation, and delivering outstanding service. The company looks forward to this next phase of growth and to continuing its strong partnerships with clients under the Pressure Dynamics Queensland banner.

BETTER TOGETHER
